

LISCAD Transformations

Where in the World is your Data?

LISCAD provides the easy answer when performing coordinate transformations on your projects.

"Transformations" performs least squares transformations and also transforms between projections.

The benefits...

TRANSFORM BETWEEN ANY DIFFERENT PROJECTION...

using a variety of transformation techniques such as Bursa-Wolf, Molodensky-Badakas, 3 Parameter Shift and Grid File.

FULL REPORTING...

of all transformation parameters.

LEAST SQUARES TRANSFORMATION...

by Conformal, Semi-Affine, Affine or Unscaled methods.

INDEPENDENT WEIGHTING...

of coordinate pairs.
